

**AMENDMENTS TO THE CLAIMS**

1. (Original) A method of synopsisizing large data sets to facilitate the use of an accessibility system, comprising:
  - providing a large data set and formatting said large data set in a markup language data structure;
  - generating a synopsis of said large data set;
  - formatting said synopsis of said large data set in a synopsis container that includes said large data set and said synopsis of said large data set; and
  - transmitting said synopsis container to a computer having an accessibility system.
2. (Original) The method of claim 1 wherein providing a large data set comprises automatically generating said large data set in response to a user input.
3. (Original) The method of claim 1 wherein providing a large data set comprises retrieving said large data set from storage in response to a user input.
4. (Original) The method of claim 1 wherein formatting said large data set for transmission comprises generating markup language data structures to direct the display of said large data set at a client terminal.
5. (Original) The method of claim 1 wherein generating a synopsis of said large data set comprises automatically generating said synopsis by comparing data elements in said large data set to predetermined metrics.

6. (Original) The method of claim 1 wherein generating a synopsis of said large data set comprises writing said synopsis by an individual.

7. (Original) The method of claim 1 wherein formatting said synopsis of said large data set in a synopsis container comprises generating a markup language data structure defining said synopsis container.

8. (Original) The method of claim 1 wherein transmitting said synopsis container comprises transmitting a markup language data structure including said large data set and said synopsis.

9. (Original) The method of claim 1 wherein said accessibility system is a screen reader.

10. (Currently amended) A computer readable medium including one or more computer programs operative to cause a computer to ~~generate a markup language data structure for synopsisizing a large data set comprising~~ perform the steps of:

generating a markup language data structure initial tag;

generating at least one attribute comprising a synopsis of said a large data set;

generating a markup language data structure containing said large data set; and

generating a markup language data structure terminating tag; and

outputting a markup language data structure synopsisizing the large data set and

operative to cause a computer having an accessibility system to output the synopsis of said large data set.

11. (Currently amended) The computer readable medium of claim 10 wherein the ~~data structure further comprises~~ computer programs are further operative to cause a computer to perform the

step of generating a flag attribute indicating whether or not to a computer having an accessibility system should output said large data set.

12. (Currently amended) The computer readable medium of claim 10, wherein ~~said data structure is associated~~ the computer programs are further operative to cause a computer to perform the step of associating the markup language data structure with the keyword CONTAINER.

13. (Currently amended) The computer readable medium of claim 10 wherein ~~said~~ generating a markup language data structure initial tag is comprises generating the tag <CONTAINER> and said generating a markup language data structure terminating tag is comprises generating the tag </CONTAINER>.

14. (Currently amended) The computer readable medium of claim 10 wherein ~~said data structure is~~ outputting a markup language data structure synopsisizing the large data set comprises outputting a markup language data structure compatible with the Hyper-Text Markup Language.

15. (Original) A computer readable medium including one or more computer programs operative to cause a computer to generate and transmit a synopsis container for a large data set, the computer programs causing the computer to perform the steps of:

formatting said large data set in a markup language data structure;

generating a synopsis of said large data set;

formatting said synopsis of said large data set in a synopsis container that includes said large data set in said markup language data structure; and

transmitting said synopsis container to a computer having an accessibility system.

16. (Original) The computer readable medium of claim 15 wherein said accessibility system comprises a screen reader.

17-18. (Cancelled)
